Jeanna,

I can understand your confusion, and that is some language I may need to clean up a bit next time. It is basically just referring to the fact that your blog post and screencast explanation are constructed to be consumed online; it is fine if you mention in your explanation of how you would use it to actually teach your lesson, even if that is face-to-face. The main thing I am looking for here is that students utilize an online tech tool, whether that is done in-person or online.

Does that help?

Dr. Logsdon

**Subject:** LITE 535 Blog 1 Question

Hello Dr Logsdon,

As I was wrapping up my blog entry today, I re-read the directions on the "Create Excellence Framework" document. Unfortunately, I saw for the first-time, number 1 under "Prompt" states "instructional activity for teaching your class online that is related to Real-World Learning". What does "teaching your class online" mean? Does that mean there is to be no in-person part of the activity? Or that the students utilize an online technology tool embedded in the activity while being in person and perhaps collaborating in person? Any clarification would be helpful so I can determine if I need to make any modifications to my post.

Thank you for your assistance!

Jeanna Robison
