Engage students learning at home

Ace distance learning by assigning **student-paced challenges** for your class to play at home. Questions and answers appear on the student's app or desktop, so it's perfect for home learning.

Assign this kahoot as a student-paced challenge and let your class replay it. You'll see how much they remember - and how much they've improved!

Focus on accuracy!

Turn the question timer off when assigning a student-paced challenge so students can focus on accuracy and master tricky topics.
