Thank you so much, Dr. Logsdon. I am honored to be here again. I am SO looking forward to that graduation picture.... And it will most definitely be framed in that classroom. It'll remind me every day of the gratitude and the blessings that went into me being at WKU and getting my degree. It means the absolute world to me to be here. You all completely turned my year around and I am forever thankful for that.

Maria,

I cannot tell you how happy receiving an email like this makes me. I am so honored to be a part of your educational journey, and I am tremendously happy that you are back for your sophomore year.

We'll take a photo together with all of us at graduation. That's all the thanks that I will personally ever need.

Please don't hesitate to reach out to me if there is ever anything that I can do to help you out while you are here at WKU.

Dr. Logsdon

I'm reading some old journal entries from last year that I wrote on my computer about having to move home and go to UofL, and as I'm reading them, I can hear in my tone that the result of moving home was not meant to happen. It was something that I had to do at the time... but now I see that there was a clear reason that it didn't happen. I know I've previously expressed thankfulness for the nomination of the scholarship, but this thankfulness only continues to grow every day that I'm with classes, and every day that I'm at this school. Being here again is making my parents so proud, my family proud, and me... immensely grateful that this all happened. I saw Mrs. Hussung in the hallway yesterday, and she said, "Every time I see you in GRH, I just can't believe you're here!!!" Thank you, a million times over. This school and all of the memories I've made here thus far are so special. I've been relating everything I learned in EDU 250 and EDU 260 to every course that I've been in so far this semester, and it makes me so excited to get my degree from here, and to become a teacher. I don't think I'll be able to say "thank you" enough.

Maria Carey
