The 24th will be fine! I'll put you down for that. When does 1st period start and end?

The 24th works perfectly for me if that is not too late in the semester!

Jaden,

I unfortunately cannot on that day, as I have another commitment that morning. I can if we you wanted to push it back to April 24th.

Just let me know your preference!

Thanks,
Dr. Logsdon

Subject: Observation next week

Dr. Logsdon,

I was reaching out in regards to my last observation. Previously, we met for 5th period. I was hoping for this last meeting, we could meet for 1st period instead. We have 2nd and 3rd period planning, so we could also finish our last conference as well.

Thanks,
Jaden Harp
