

April 23, 2024

Dr. Logsdon,

I've sent you and Dr. Super a few emails throughout this semester, and a lot of questions regarding that Praxis... (sorry!) but it's always been an annual thing for me to write letters to the teachers who have left an impact on me for that year. I am so thankful that you're one of the professors that has left that impact on me!

The nomination that you and Dr. Super put in for me this time last year has been one that has motivated me throughout this entire school year, and that motivation is going to lead me throughout my entire teaching career. I have been wanting to be a teacher since I was 6 years old, and the trials that my family and I were facing this time last year, were ones that led me to a place of massive uncertainty. The desire that I had to go home and be with my family, as well as our financial burdens were ones that were going to lead me back home. But, a year later, I'm sitting in the Student Success Center, writing to you all, who I will always be beyond grateful for.

My family and I are so thankful for you, and I just wanted to thank you again for being a constant mentor, and someone who will always support and encourage his students. I cannot wait until we all take that picture at graduation, in 2 years, which will be copied and hung to my classroom wall! Thank you all for believing in me, encouraging me, and for being constant supports to all of your students. I cannot wait for these next two years.

-Maria Carey
